

Introducing the Extraordinary ADL iDevice iD-35 Companion Stereo Cables

For The Best Performance You Can Buy!

ADL (Alpha Design Labs) uses Furutech's Pure Transmission Technology to create high-value, innovative designs that everyone can afford. And in the age of personal, portable electronics everyone carries their music with them to connect to headphone amps, home audio and even car systems. And there are no better sounding (or hip-looking) cables than the iD-35 series.

iD-35SP

iD-35R

iD-35L

Not Just Another Pretty Face

The iD-35 series are no ordinary cables; they've engineered and produced with Furutech's Pure Transmission technology and feature silver-plated α (Alpha) OCC conductor (28AWG) for minimal transmission loss and 24k gold-plated 3.5mm stereo connector, straight or angled, or 24k gold-plated RCA connectors. The cable achieves top-grade noise isolation using double-layer shielding – aluminum foil and tinned copper – in a RoHS-compliant sheath. The main conductors are treated with Furutech's α (Alpha) Process – a deep cryogenic and demagnetizing treatment. The result is outstanding, wideband, colorful and engaging sound that audiophiles and music lovers will love.

Connector Types

3.5mm straight-to-3.5mm straight

iD-35SP 0.15M	Cable length: 10cm (3.9in)
iD-35SP 0.6M	Cable length: 60cm (2ft)
iD-35SP 1.2M	Cable length: 120cm (3.9ft)
iD-35SP 1.8M	Cable length: 180cm (5.9ft)
iD-35SP 3.6M	Cable length: 360cm (11.8ft)
iD-35SP 5.0M	Cable length: 500cm (16.4ft)

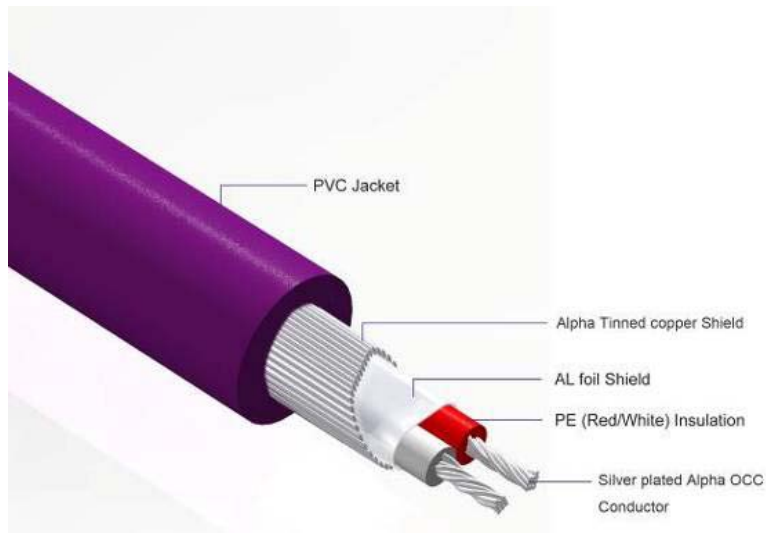

3.5mm straight-to-RCA

iD-35R 0.6M	Cable length: 60cm (2ft)
iD-35R 1.2M	Cable length: 120cm (3.9ft)
iD-35R 1.8M	Cable length: 180cm (5.9ft)
iD-35R 3.6M	Cable length: 360cm (11.8ft)
iD-35R 5.0M	Cable length: 500cm (16.4ft)

3.5mm straight-to-3.5mm Angled

iD-35L-0.15M	Cable length: 15cm (5.9in)
--------------	----------------------------

Construction

USB sounds best, but the iD-35 comes in a close second! Either way you'll enjoy some of the best sound available while looking – and sounding -- as hip as they come!
