

Introducing the ADL iHP-35B Stereo Headphone Cable For Intimate Listening...

ADL – Alpha Design Labs – creates innovative, smart-looking components with scintillating sound for computer-based systems as well as personal and portable electronics. Tokyo-based ADL aims high using the best materials and innovative design for an expanding line of Japanese-designed precision products that now include the ADL iHP-35B.

High-quality headphones are a must in the age of personal, portable electronics, but many are supplied with inferior throw-away cables. Headphone listening is an intimate experience and enthusiasts always want better sound. ADL's iHP-35 cables accomplish that in spectacular fashion with headphones, players and headphone amplifiers.

iHP-35B-1.3M / 3.0M

Not Just Another Pretty Face

The iHP-35B is no ordinary cable; it's engineered and produced using Furutech's Pure Transmission technology. The cable features silver plated α (Alpha) OCC conductors treated with Furutech's α (Alpha) Process – a deep cryogenic and demagnetizing process. The connectors are a 24k gold-plated 3.5mm stereo connector with a housing formed of nonmagnetic aluminum and a molded angled 24k gold-plated 3.5mm stereo connector. The cable achieves extremely high noise isolation in a RoHS-compliant sheath. The result is outstanding, wideband, colorful and engaging sound that audiophiles and music lovers will love.

For beats pro, beats studio, beats mixr, beats solo, beats executive, FOCAL Spirit One - Headphone Use (Not suitable for use with beats Pro Red)

Cable Construction

Cross Sectional View
