

FURUTECH

PURE TRANSMISSION

The New and Improved - PC-α (Alpha)

Safe Powerful Antistatic Cleaning Agent

For CDs, DVDs and Video displays (TVs, Tablets, PCs and Smartphones)
(25ml)

- New PC-α with its "Pure Clean" natural properties (special combination of enzymes and ions) is a powerful cleanser for CDs, DVDs and Video displays (TVs, Tablets, PCs and Smartphones). It will maximize the laser reading capability on CDs and DVDs producing high quality sound and image resolution.
- Totally free of pollution causing materials including interface active agents, and chemical skin irritants, this product is both environmental friendly and extremely safe to use on any surface and will not damage surfaces or leave residue.
- It does not leave an Oxide film on CDs and DVDs and will help increase laser light transmission through the media reproducing higher quality sound and picture.
- PC-α has a surface tension value of 56mN/m (2556mN/m of (25°C) so it will penetrate the smallest surface irregularities to remove dust and grime.
- PC-α does not contain any synthetic surfactant, alcohol or fluorescent agents, so it will leave residue or cause stickiness. It also will not cause discoloration and kills mold.
- It has an antistatic effect substrate surface resistance (Ω) of $10^{12}\Omega$ to completely eliminate static charge and cling.

Usage

Simply spray this product directly on surface and wipe with a clean cloth.

Best result is obtained if a clean cloth is used to completely dry surfaces without leaving any residual traces.

Cautions

Please rinse with plenty of water when get in contact with eyes.
